

An Axis Communications company

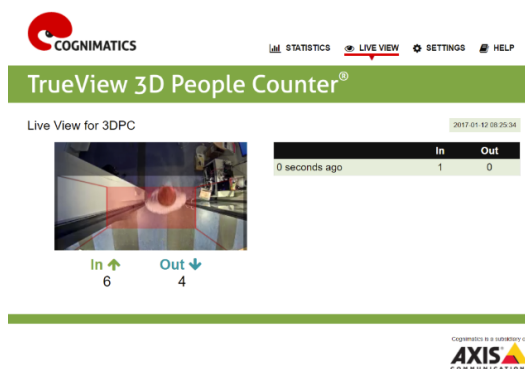

Last newsletter from Cognimatics – but not the last news!

Cognimatics was acquired by longstanding partner Axis in June 2016. Together with the Axis team we have been working on integrating our solutions under the Axis brand. We will share more information with our partners during February and March.

To all of our loyal readers, we hope you want to continue to follow news about our offering through the Axis website, social media channels, blog and newsletter. Subscribe directly from www.axis.com. Axis Channel Partners, be sure to register for the Axis Channel Partner Program to take advantage of enhanced margin opportunities, Axis product portfolio, and training and support.

TrueView 3D People Counter launched at Retail's Big Show in New York

TrueView People Counter[®] pioneered the world of embedded analytics when it was launched over a decade ago. A 3D version of the globally renowned TrueView People Counter[®] has been high on the wish list from Cognimatics' partners and the application became available on February 1st. The application runs on the AXIS P8804 Stereo

Sensor Kit – available from Axis distributors <https://www.axis.com/se/sv/where-to-buy>.

TrueView People Counter[®] continues to be an exceptional choice for a people counting solution in most retail environments. When there is strong sunlight, shadow effects, ceiling heights from 2.40 m (7.8 feet) and a heavy flow of customer traffic, TrueView 3D People Counter can be an attractive alternative. **Note:** TrueView 3D People Counter is not compatible with TrueView WebReport[®].

Release of TrueView Queue[®] 2.0

TrueView Queue 2.0[®] is now available and the version which is sold/supported.

Major improvements compared to 1.x:

- Added minute resolution data of average people in queue.
- Added reporting to TrueView Xense[®] (requires TrueView DataManager[®] 1.4.2).
 - This is with variable TrueView DataManager[®] reporting interval, 1, 5 or 15 minutes. 5 default.
- Support for 16:9 aspect ratio.
- New area (former region of interest) setup and calibration page.
- Proxy support for reporting.

Note: TrueView Queue[®] 2.0 is not compatible with TrueView WebReport[®].

End of life TrueView WebReport[®]

TrueView WebReport® locally installed has been Cognimatics' in-house reporting alternative. As of today, we announce that it will reach end of life by 31.03.2017, which is also the End of Sale (EOS) date. On the EOS date, it is removed from the price list and no longer available for purchase.

The End of Life announcement also includes the End of Support (EOST) date, which in this case is one year after the EOS date unless customer has purchased a separate support agreement.

Best regards and so long,

Your friends at Cognimatics
