

TRUEVIEW One Way® 1.0

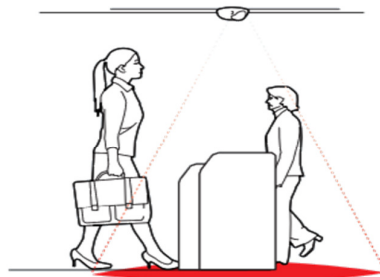

New product

Control the Flow of Traffic!

Cognimatics presents TrueView One Way®, offering a cost efficient, scalable, and easy-to-install tool for preventing people from moving in the wrong direction.

Description

TrueView One Way® is an automated stand-alone, one way passageway control system for ceiling mounted cameras, that is powered by Cognimatics leading patent pending image processing software. The unit detects in real time when someone moves in the wrong direction. The detection event can be used to send video clips, SMS, play sound files, etc. The installation is so easy that it can be performed and maintained by your own staff. Furthermore, accessing the camera over IP is very cost efficient for maintenance, where you can manage camera and software remotely.

TrueView One Way® embedded for Axis network cameras.

Features

Direct customer flow and direction: Detect people moving in the wrong direction in real time.

Event management: Trigger and manage alarms using standard protocols.

Two way counting: Counts people moving in two directions simultaneously

Data storage and management: Push counting data automatically from camera to TrueView Web Report®.

Additional functionalities: Includes a fully functional TrueView People Counter®.
